SPECIAL TOUCH BAKERY

Christa Construction LLC provided Construction Management consulting services during the design phase of the project and then continued into the construction phase as General Contractors. The project was a renovation of an existing 20,000 square foot facility into a bakery.

The facility, is operated by Rochester School of the Holy Childhood Inc. The expansion of the bakery allows for a wider array of opportunity for individuals with and without disabilities. The new bakery expands upon legacy pie-baking operations that have been underway as vocational training at Holy Childhood for more than 30 years.

Special Touch Bakery is a tremendous community asset, providing skills to people who most in need of opportunities for work in our community.
